Tableau de bord

Pour mon tableau de bord, j'utilise le site web Feedly.
Je ne peux cependant pas vous le partager car ce n'est disponible que pour les versions payantes.

Voir la capture d'écran ci-dessous :

How can I share a Board?

Sharing a Board Privately

If you're looking to share a board privately, Feedly Enterprise was built for that purpose: allowing you to create a shared Feedly environment for your team

Feedly Enterprise is the collaborative edition of Feedly, which allows you and your team to stay on top of information that matters to you as a group.
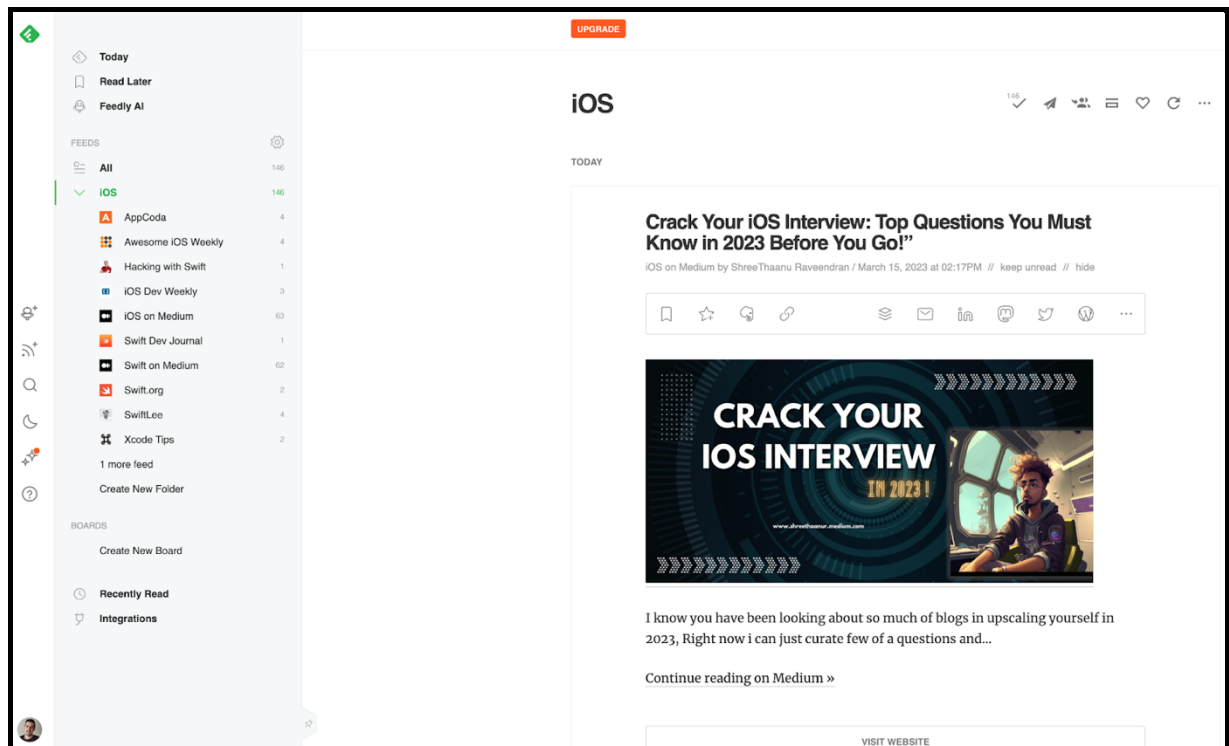

Sharing a Board Publicly

There are multiple options to disseminate the knowledge and insights you gather in a Feedly Enterprise Board to the outside world.

> *Pro Tip: these sharing tools will generally leverage your Annotations and Highlights as well - it's a good practice to use those marking features to add insights to articles you save to your boards*

You can share Personal Boards publicly via the globe icon on the right side of your Board (*available in Feedly Pro plan and above*)

Note: We import the last 100 articles from the Board when you make it public. After that, it behaves like a feed, we keep the full history. Users that are logged in will see all articles on the Board. Users that are not logged in will see the last 20 articles.

<u>Je vous propose donc une capture d'écran de mon tableau de bord, que je présenterais bien entendu lors de la soutenance :</u>

Sur la gauche, vous pourrez y retrouver, dans le dossier intitulé « iOS », la liste des différents sites d'informations que je suis.

Leur contenu s'affichera sur la partie droite, où on a la possibilité de régler l'affichage de ces articles selon nos préférences.
